**PLACENTA**

There is a single placenta located on the \_\_\_\_\_ wall and is \_\_\_\_\_mm from the int os The cord insertion was normal/marginal/velamentous. The dividing membrane is thick / thin measuring \_\_\_mm.

TWIN A's placenta is located on the \_\_\_\_\_wall and is \_\_\_\_\_mm from the internal os. The cord insertion was normal / marginal / velamentous.

TWIN B's placenta is located on the \_\_\_\_\_wall and is \_\_\_\_\_mm from the internal os. The cord insertion was normal / marginal / velamentous.

The cervix is closed, measuring \_\_\_\_\_ mm in length. There is no vasa previa. (Measurements obtained TA or TV )

**TWIN A: GROWTH PARAMETERS**

BPD \_\_\_\_\_mm (\_\_\_\_centile)

HC \_\_\_\_\_mm (\_\_\_\_centile)

AC \_\_\_\_\_mm (\_\_\_\_centile)

FL \_\_\_\_\_mm (\_\_\_\_centile)

Amniotic Fluid \_\_\_\_\_mm ( deepest pocket)

**TWIN B : GROWTH PARAMETERS**

BPD \_\_\_\_\_mm

HC \_\_\_\_\_mm

AC \_\_\_\_\_mm

FL \_\_\_\_\_mm

Amniotic Fluid\_\_\_\_\_mm ( deepest pocket)

**GROWTH SUMMARY**

The estimated fetal weight for TWIN A is \_\_\_\_\_ grams which corresponds to the \_\_\_\_\_ centile which is consistent with/ less than/ greater than) the normal range for the assumed gestational age. TWIN B weighs \_\_\_\_\_ grams , which corresponds to the \_\_\_\_\_centile, which is consistent with/ less than/ greater than) the normal range for the assumed gestational age.

**ANATOMY**

TWIN A	TWIN B	
		Ventricles
		Lips.nose
		4 chamber heart
		LVOT
		RVOT
		Diaphragm Left
		Diaphragm Right
		Stomach
		Bladder
		Kidneys

TWIN A	TWIN B	
		Fetal Breathing /2
		Fetal Movement /2
		Tone /2
		Liquor /2
		TOTAL /8

**DOPPLER**

TWIN A	TWIN B	
		Umbilical Artery PI
		Umbilical Artery S/D
		MCA PSV
		MCA PI
		Ductus Venosus
