PLACENTA

There is a single placenta located on the _____ wall and is _____mm from the int os The cord insertion was normal/marginal/velamentous. The dividing membrane is thick / thin measuring ___mm.

TWIN A's placenta is located on the _____wall and is _____mm from the internal os. The cord insertion was normal / marginal / velamentous.

TWIN B's placenta is located on the _____wall and is _____mm from the internal os. The cord insertion was normal / marginal / velamentous.

The cervix is closed, measuring _____ mm in length. There is no vasa previa. (Measurements obtained TA or TV)

TWIN A: GROWTH PARAMETERS

BPD _____mm

HC _____mm

AC _____mm

FL _____mm

LIQUOR _____mm (largest pocket)

HEART RATE_____bpm

TWIN B : GROWTH PARAMETERS

BPD _____mm

HC _____mm

AC _____mm

FL _____mm

LIQUOR _____mm (largest pocket)

HEART RATE_____bpm

DATES/GROWTH SUMMARY

These measurements correspond to an average gestational age of ___w___d for Twin A which is consistent with/less than/ greater than) the normal range for the assumed gestational age and ___w___d for Twin B which is consistent with/ less than/ greater than) the normal range for the assumed gestational age.

FETAL ANATOMY TWIN A

Head

- Falx
- Cavum Septum
- Skull Bones
- Choroid Plexus
- Ventricles _____mm
- Cerebellum _____mm
- Cisterna Magna _____mm
- Nuchal Fold _____mm

Face

- Orbits
- Lips/ nose
- Jaw
- Profile

Spine

- Coronal
- Sagittal
- Axial
- Skinline

Umbilical Cord

- Placental Insertion
- Fetal Insertion
- 3VC

Heart

- Position/axis
- Four Chambers
- LVOT
- RVOT
- Aortic Arch
- Ductal Arch
- 3 vessel view

Abdomen

- Diaphragm
- Stomach
- Left Kidney
- Right Kidney
- Bladder
- Abdo wall

Limbs

- 12 long bones
- Hands
- Feet
- Position of joints

FETAL ANATOMY TWIN B

Head

- Falx
- Cavum Septum
- Skull Bones
- Choroid Plexus
- Ventricles _____mm
- Cerebellum _____mm
- Cisterna Magna _____mm
- Nuchal Fold _____mm
